KIRKLAND INTRODUCTIONS

Foreword

Iris season has come again. Each year we look forward to the time when irises unfurl their silken banners and we worship anew at their shrine. The newer bearded irises are very lovely and so superior in every respect, that they are rapidly supplanting the older varieties. After these come the Japanese Irises. They have an indefinable quality that gives them distinction, and look like colorful butterflies swaying on a stem.

The best way to select irises is to see them in bloom. Pictures, (whether in color, or black or white) and descriptions, no matter how accurate, are only a substitute for the real thing. So arrange to make a trip to your nearest iris garden during blooming time, and you will be better satisfied with the varieties you select.

Terms

Payment is expected when irises are delivered. This will be within a few weeks after the blooming season. We also recommend Fall planting in September and October.

Location

From North Little Rock drive North on Main Street to Park Hill, East on D. Street to Idlewild, North on Idlewild to Goshen, East to 331 Goshen. The Garden is on the left.

New Kirkland Introductions for 1941

SPECIAL NOTICE

Vestal's Iris Garden now has exclusive distribution of all new irises from The Iris City Gardens of Thomas A. Williams at Nashville, Tenn. This also includes the introduction and exclusive sale of all of the famous Kirkland irises which we and Mr. Williams have been propagating since the Chancellor's death. This work will be continued both at Little Rock and Nashville but **ALL ORDERS SHOULD BE SENT TO US at Little Rock.**

BROWN THRASHER. This is the striking new golden brown flower which Dr. Kirkland pronounced the finest iris he had ever developed. It is a bicolor in two shades of pure brown, the falls being several shades darker than the standards and very velvety. The coloring suggested the name, being just the bright tone of sunlight on a brown thrasher's wing.

All available stock for this season is sold.

KLONDYKE GOLD. An enormous flower of pure, even, deep yellow. Standards upright, slightly domed. Falls very wide and semi-flaring. The substance is very heavy, each bloom lasting several days without fading. In our garden last year each bloom measured 22 inches in circumference. The growth and branching are fine. **\$25.00**

REDDENGOLD. This is best described as a large, tall yellow-copper bicolor. The standards are pure golden yellow and the falls a solid color of bright brown-red, overlaid with golden yellow. A fine grower with excellent branching. **\$25.00**

RISING SUN. This iris was registered several years ago but Dr. Kirkland lost almost the entire stock. The supply still is very limited. It is an immense deep rosy pink bicolor. Very tall and well-branched. Some judges have called it the finest deep pink they ever saw. **\$35.00**

ROBINWOOD. This created quite a furore in our garden last season. It is a large, tall, perfectly formed red-brown bicolor. The standards are clear, deep, golden brown; the falls are very bright red, slightly suffused with brown. Again, as with Brown Thrasher, a favorite songbird suggested the name. **\$35.00**

TOP SERGEANT. Another brilliant red-brown, almost a self, which drew visitors from the far side of the garden last year by its height and outstanding color. Falls are a little deeper in tone and very velvety. Exceptionally heavy substance. **\$35.00**

Kirkland Introductions of Previous Years

BLUE SAVANNAH: Rich blue. 34 in. 50¢

ASHES OF ROSES (Kirkland 1940) A fine upstanding iris, somewhat of Dominion carriage, of a most pleasing rose-gray tone throughout. BRONZE IMAGE (Kirkland 1940) Selected by dozens of judges and visitors as a most worthy addition to the bright bronze toned irises for which Dr. Kirkland has become justly famous. It is tall and stately and its two tones of brilliant red and gold bronze certainly dominated the garden last year. Quite distinct from the earlier Indian-named varieties introduced by Dr. Kirkland. \$7.50

tall. The blooming stems are wiry and strong, always erect. Branching is excellent. The flower is large and well shaped, falls gracefully flaring.
